Wisconsin AHEC advances health equity in our rural and underserved communities through education and training opportunities that aim to increase the diversity, distribution, and development of our healthcare workforce.

College and Health Profession Students

Educational and training activities connecting students to rural and underserved communities and focusing on interprofessional education, behavioral health integration, social determinants of health, cultural competency, practice transformation, current and emerging health issues, virtual learning and telehealth, and supporting health professionals. Our two hallmark programs, AHEC Scholars and Community Health Internship Program are showcased here.
